-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This office action is in response to communication filed on 1/28/2002.
2. Claims 1-34 are presented for examination.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-34 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-25 of U.S. Patent No. 6,347,304.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the patented claims further recite a database with sales data.

Official Notice is taken that it is old and well known in the computer related arts to store data in a database for easy access and retrieval. It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included a

database containing sales data because such a modification would provide the above mentioned advantage.

Allowable Subject Matter

5. Claims 1-34 are allowable over the prior art.

The present invention comprises a system and method for recovering and remitting tax revenue from multiple jurisdictions in which a remote seller has no nexus. The closest prior art of record are:

- A. Francisco (5,875,433 hereinafter Francisco) teaches a system and method wherein the credit card company is required to disperse the use tax funds charged to the customer.
- B. article titled, Feldman "Smart Buying: Everything you need to know to pick up the Phone and Buy With Confidence"(hereinafter Feldman) teaches a system wherein states cooperate with one another to exchange state audit data so the one state can send the names of purchasers to another states in which the purchase is a resident.
- C. Cretzler (5,644,724) teaches collecting sales taxes and transferring the credited or debited taxes to the tax authority bank computer.

The references alone or in combination failed to teach **"sending sales information message regarding a taxable event from a remote seller to a central facility, said sales information message identifying a tax jurisdiction of a participant in said taxable event, said remote seller not having a nexus in said tax jurisdiction ; providing the tax rate information from the central facility to the remote seller for the tax jurisdiction of the participant and collecting a tax**

payment”. This patentable distinction is included in independent claims 1, 14, 19, 23, 24, 25, and 31.
